Mongo 2.6 create new user

```
use admin
db.createUser({ user: 'user', pwd: 'password', roles: [ 'userAdminAnyDatabase' ] })
or
db.createUser({user:"username",pwd:"password", roles:[{role:"root",db:"admin"}]})
use dbname
db.createUser(
  {
    user: "username",
    pwd: "passowrd",
    roles: ["readWrite"]
  }
)
db.grantRolesToUser(
  "username",
  [
    { role: "readWrite", db: "dbname" }
  ]
)
```
